## Special Notes About Distributing Parts:

The **Build-A-Band Series** should be approached by giving careful consideration to the distribution of parts within your group to attain the best possible blend. You should also feel free to adjust dynamic levels, and to instruct any instruments to adjust octaves at your discretion. In many cases, reducing or adding to the number of players playing a part can greatly help with balance, and make for a much more musical performance. Remember, the flexibility in scoring allows you to be creative to enhance the sound of your group.

The cymbal, snare drum and bass drum parts are all included on one part labeled **Percussion Part**, so that they may be performed by either separate players or by one player on a drum set.

The **Mallet Percussion Part** may be performed for the specific mallet percussion instrument but it can be performed by any mallet percussion instrument, and may be doubled if you have multiple players and instruments. For best results, be creative in assigning which instruments play in the different sections of the arrangement.

The optional **Timpani** part is always playable with 3 timpani.

For repeated sections, in larger ensembles, consider having woodwinds play the first time and brass the second time; or have one player on each part the first time, and all players on the repeat. Another option is having one player on the 1st part as a solo, then having all players on the repeat.

In some of the arrangements which include 16th note runs you will find options to convert some of those runs into 8th notes for players of lesser abilities. This can be done with some or all of the players.

The various instrument parts are written in the octave of the most popular instrument for that part; i.e., C Instrument Part 1 parts are written in the common range for the flute. If you are playing that part on another C instrument such as the oboe, you may have to adjust to a lower octave. In many cases, parts are written in several octaves to help adjust for different instrument ranges.

All of the publications in the **Build-A-Band Series** have been arranged to be playable with any instrumentation as long as each part is used: Part 1, Part 2, Part 3, Part 4, and Bass Part 5. (**Please note: In some of these arrangements Part 4 and the Bass Part are the same, making it possible to play those arrangements with only 4 parts.**)

## Rehearsal Suggestions

The key to getting the "steamroller" effect in this arrangement is the execution of the 8th note triplet rhythms. In this arrangement these triplets often have only two notes - a quarter followed by an eighth. To teach this rhythm, have your band play a few measures of 8th note triplets in unison. Then, have them think the same rhythm, only play it as if the first two notes of each triplet are tied together. The result will be the quarter/eighth triplet.

Regarding this same rhythm: It often appears with an accent over the first note. Avoid playing these accented notes so heavily that the following note is not heard. This is especially true in the snare drum part.

There are numerous dynamic and style changes in this arrangement. Point these out by playing/rehearsing two sections where this contrast is most obvious. Remind the musicians that the best way to make the loud sections louder is to play the soft sections softer.

Thank you for programming this piece. I hope your holiday concerts are fantastic!
